

Introduction

The sequel to Plan B - "The Electron User Golden Game". Explore the computer complex, defeat the security system and escape.

You are back in charge of a single war drone. Your job is explore a Tograian Computer Complex, destroy the computer parts, fight off the security robots and escape. To get out you will need to find a number of keys to get the front door open. You will also need to find other keys to open other doors within the complex. You start at the arrival lounge in the complex.

On-Screen Information

You will see the following on the screen:

1. Number of keys collected and not used (1 key per door)

2. Energy level. This is depleted by guards and increased by collecting spanners and oil cans

3. Ammo. This can be collected around the building

4. Number of computer parts undamaged. On reaching zero, run for it!

5. Score
