

THE GAME

You have to blast the invading aliens as they form in wave attacks and clear them in the allotted time before they turn into superbreeds and become faster and more dangerous. Successive waves attack faster in more ferocious and menacing formations.

There are some special features to help you. If you have enough energy units, Smart Bombs will blast all aliens from the screen. If you have enough energy units, Inviso-flight gives you temporary invisibility and makes you indestructable. If you blast the alien energy balloon 23 times and catch the alien energy pack, then your firepower multiplies threefold.
